

# Anti-tobacco odour neutraliser

NEUTRALISE<sup>®</sup>

Unpleasant smells, such as tobacco smoke, can be a real problem in public areas. Customers and visitors will only spend time and money in places where they feel comfortable, safe and well cared for.

## Lounges & Waiting Rooms

Most people do not enjoy sitting in a room that smells of smoke. Clean smelling air promotes a sense of security and well-being that comes from being in a safe environment. Cleaner air is good business practice in

- Care homes
- Offices
- Institutions

## Kitchens & Bathrooms

Clean air also promotes good hygiene. In areas where hygiene standards are a top priority, eliminating unpleasant odours is an essential part of the cleaning programme.

## Leisure & Hospitality Venues

It only takes one cigarette to create a lingering smell of smoke. Reducing the intensity of tobacco odour will create a more pleasant environment for customers and improves the working environment for hospitality staff in

- Pubs, clubs and bars
- Hotels and restaurants
- Leisure and sports centres
- Conference halls
- Holiday camps.

***Banish the lingering odour of stale smoke and create an environment that is comfortable, fresh and odour-free.***

# NEUTRALLE®

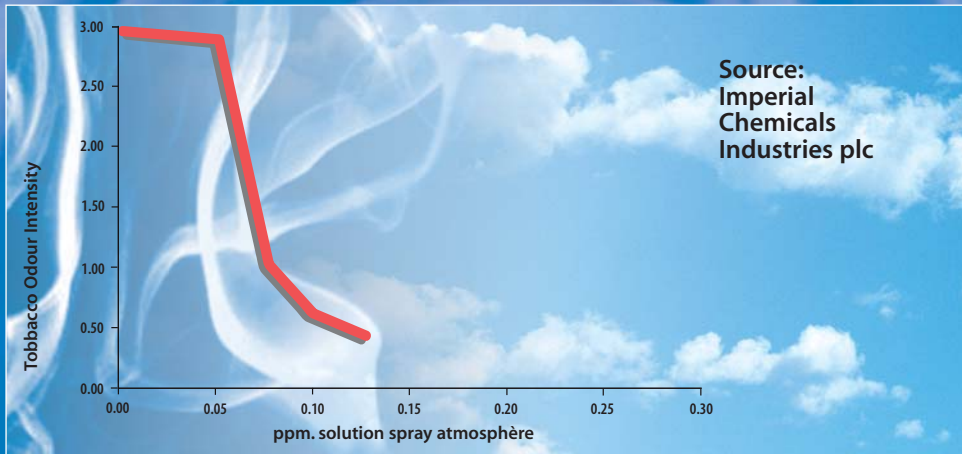

- Immediately reduces tobacco odour intensity.
- Eliminates odours caused by human habitation, animals, food, food preparation and any areas where food waste is stored.
- Features a very light fragrance to enhance the environment.

## Targets tobacco odours

NEUTRALLE X-Bac has been independently proven to neutralise a wide range of malodours and in particular tobacco odour. Formulated in association with one of the world's leading chemical developers and using the same odour neutralising technology as leading consumer body, hard surface and carpet deodourisers, NEUTRALLE X-Bac works by neutralising specific organic molecules and reducing their concentration.

The following chart shows the effect of X-Bac on tobacco odour

## Neutrale refill quality

No. of sprays per refill :	3,000
Spray technology :	Reliable consistent dosing Micro Propellant : 25ml per spray Aerosol: 75ml per spray Pump Spray: 100 ml per spray
Area of coverage :	One refill covers an area of up to 6,000 cu ft (168 cu m)
Compliance :	Safe formulation 100% compliant with EU manufacturing, filling and labelling legislation
No CFCs :	

Designed for use in:

Pump Spray dispenser / Select+ Aerosol dispenser / Aerosol dispenser / MB3000 aerosol dispenser
